

VILLAGE VISION QUESTIONS TO DISCUSS AND ANSWER

- Are you, as a committee member, satisfied with how the village looks, feels and is used? If your answer is **Yes**, then your vision work may only entail laying out what needs to be done regarding ordinances and regulations purposed to maintain that look, feel and usage. If your answer is **No**, then your work should entail asking what it is exactly that you think needs to be added or changed in the village. From that list, coupled with a “how it can be done” plan, should come your vision for the village future.
- How does that vision support the visions of the social, economic, environmental and even governance visions/plans for the town?
- What forces of change are affecting the village, and what recommendations might address these?
- What role does the village play in the Moultonborough community as a whole - and how do other parts of town influence or have an effect on the village?
- How is the village influenced by decisions made in neighboring towns?
